# Organizations with a Purpose

Source: © Nick van Dam, 2026

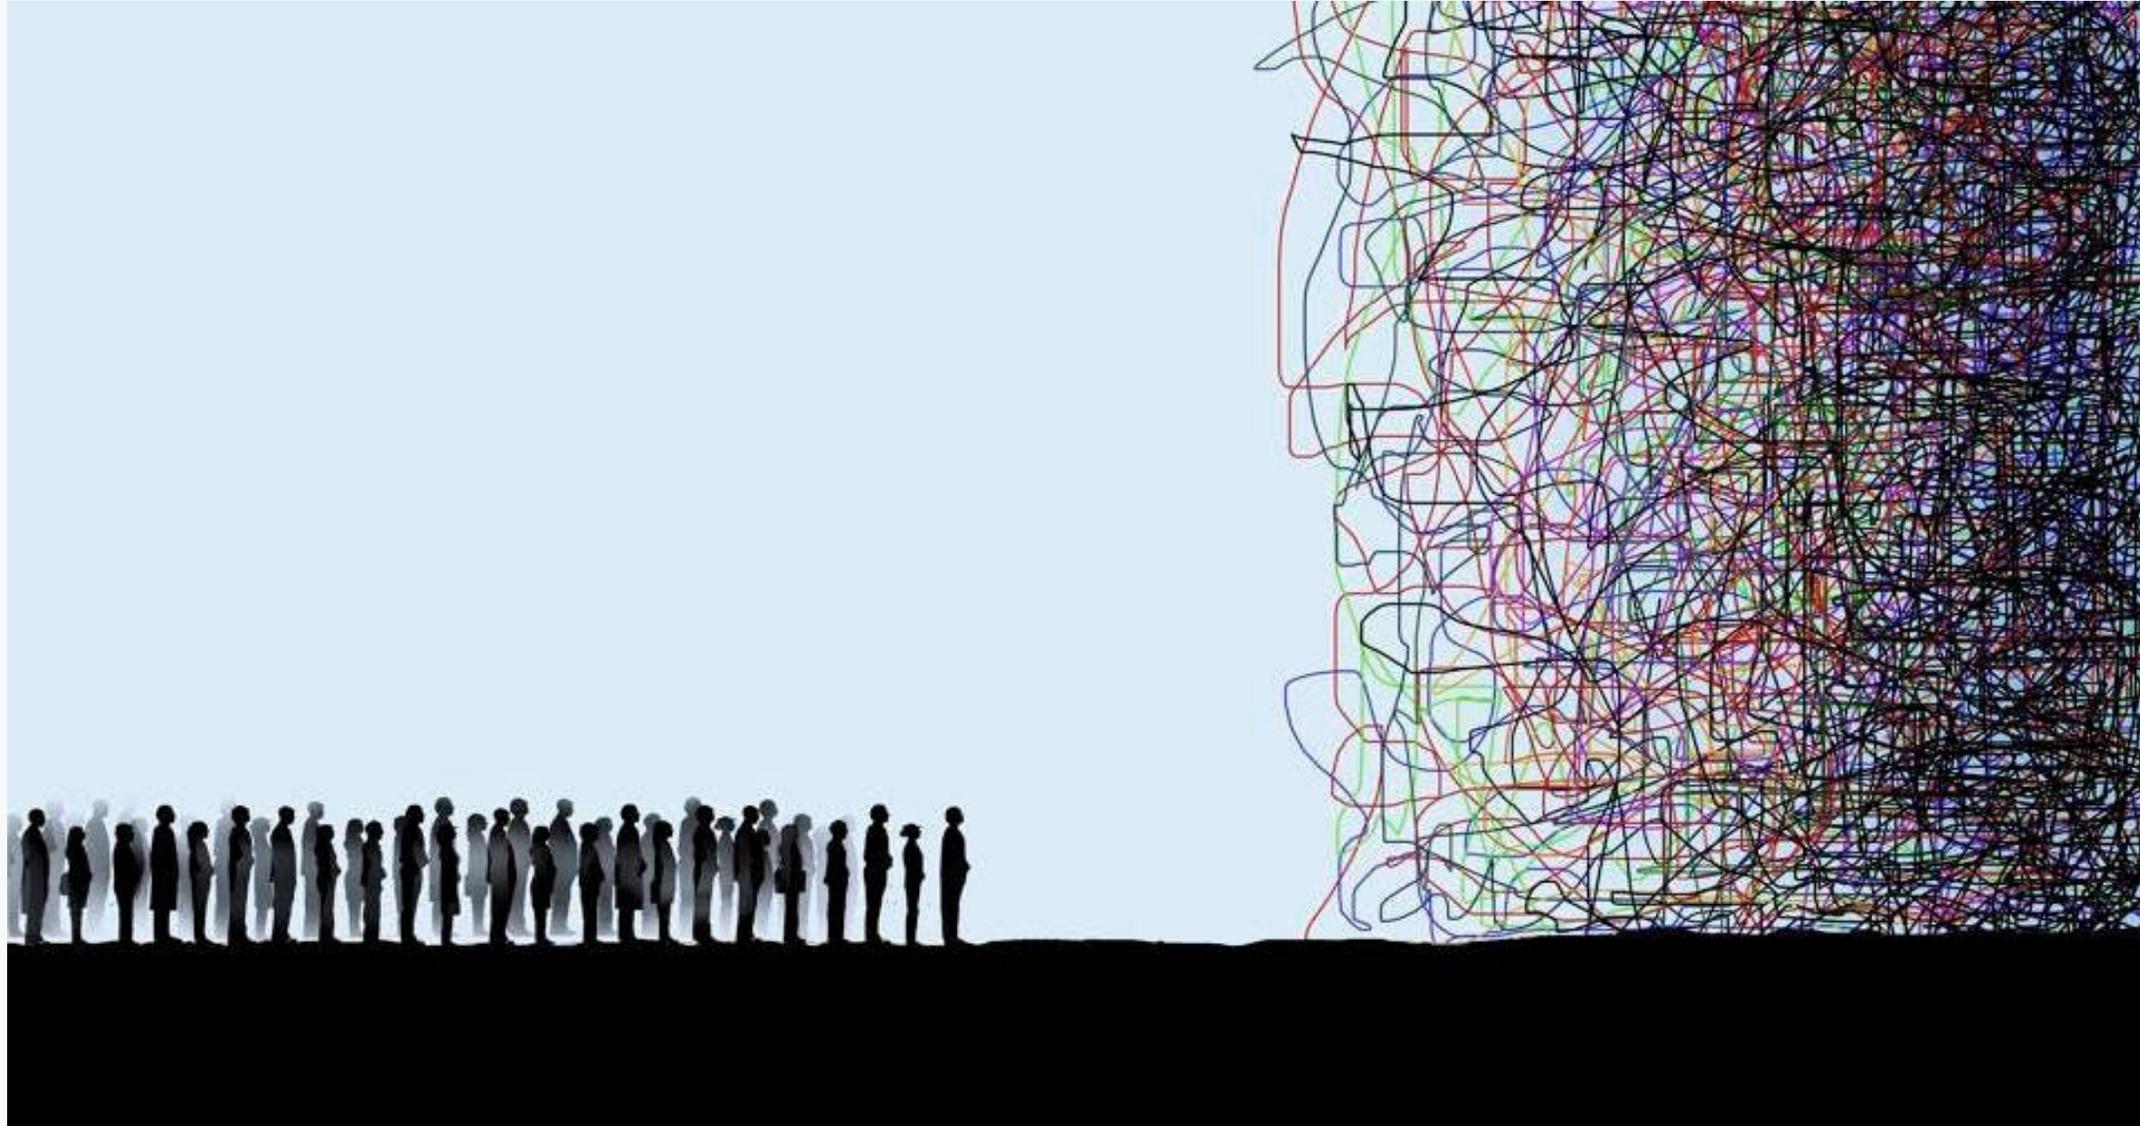

Imagine what happens when individual purpose aligns with company purpose?

2.3x

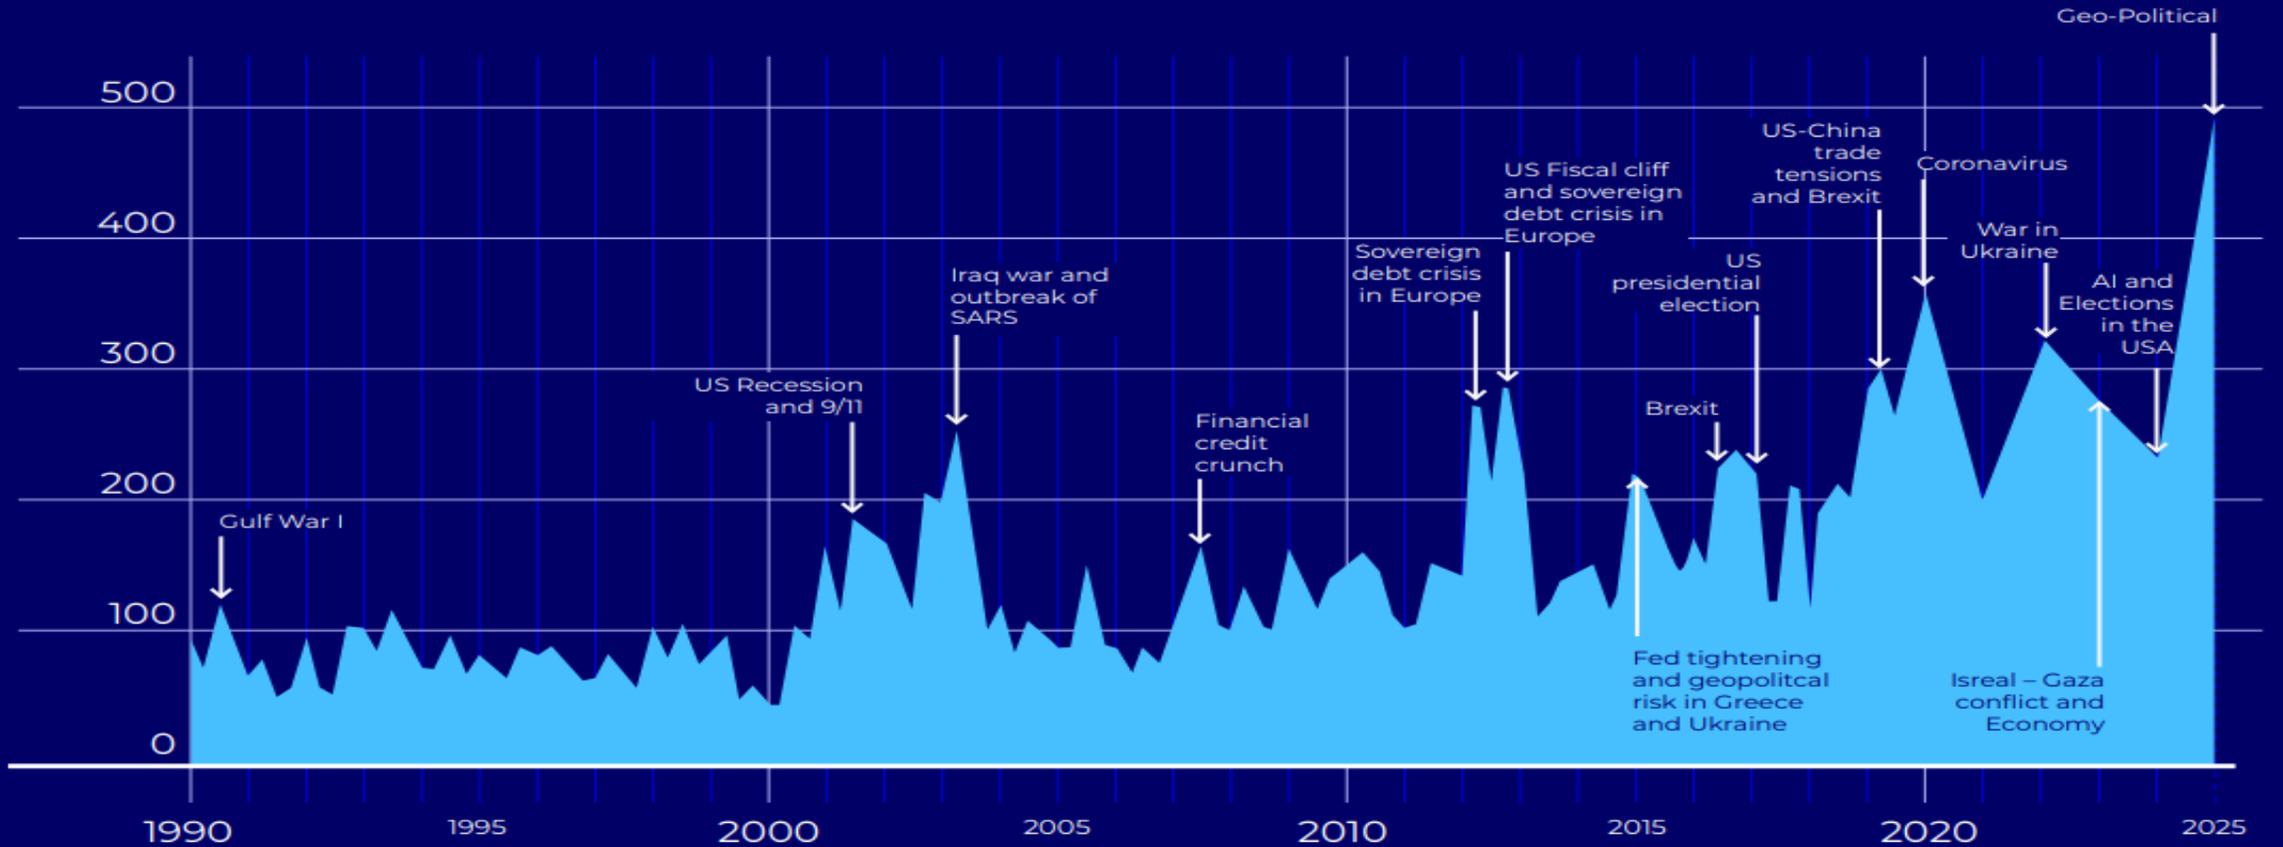

People who experience purpose at work are 2.3 times as likely to be engaged

# THEME 2: LEADING IN TIMES OF UNCERTAINTY

# World Uncertainty Index

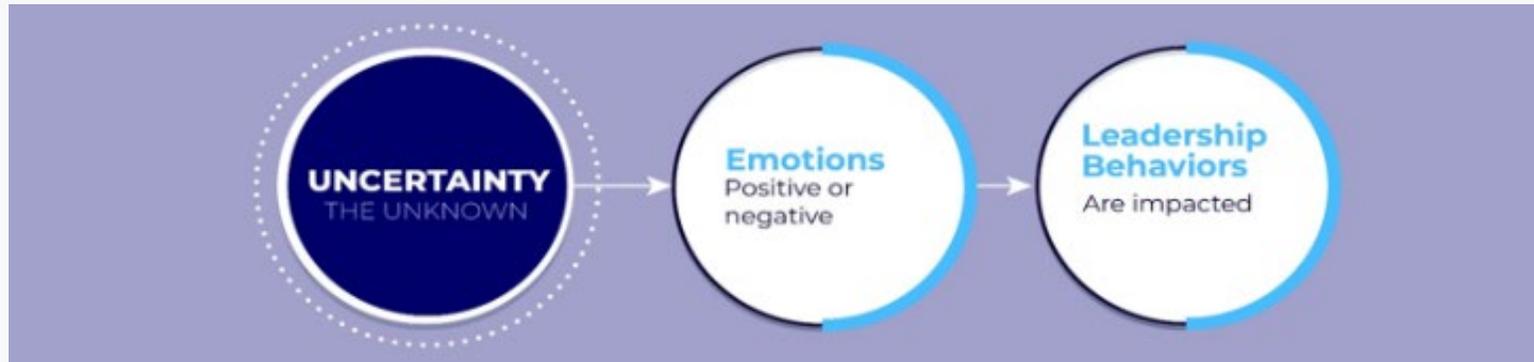

1990 – 2025

© 2025. Nick van Dam, based on <https://worlduncertaintyindex.com>

Estimated index based on data January 2025

# LEADING OTHERS: THE IMPACT OF UNCERTAINTY ON LEADERSHIP BEHAVIORS

## GROUPS OF 2

What are some **negative leadership** behaviors that might result from leaders facing significant uncertainty?  
(share examples)

# Negative leadership behaviors driven by significant uncertainty

## ❖ Autocratic Leadership

- Not engaging others in decision making
- Keep social distance from team members
- Punishment and threatening others
- Micromanagement
- Lack of empathy and ignoring employee well-being

## ❖ Intolerance of Uncertainty

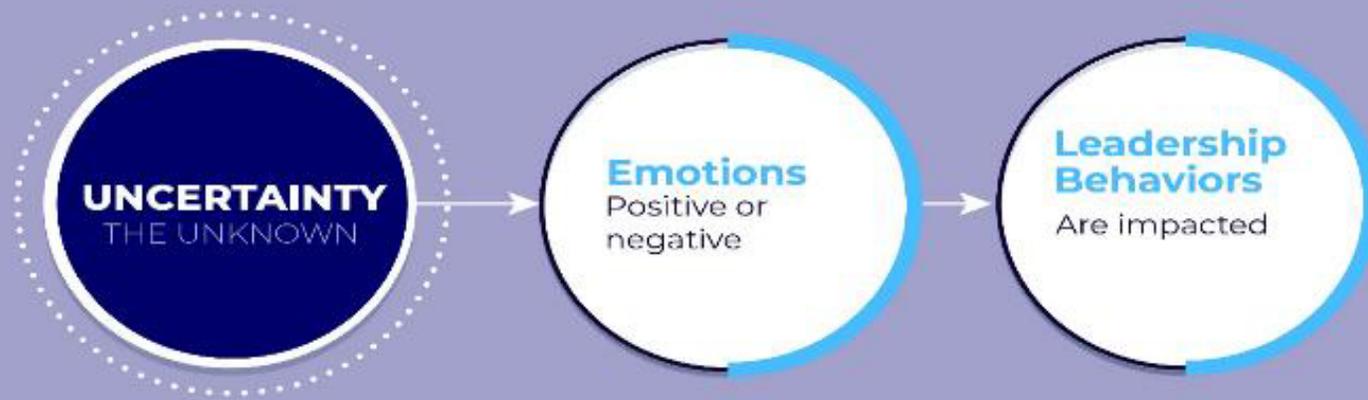

- Use social defense mechanisms including denial or mispresenting information
- Withholding Information
- Blaming others
- Resisting change

## ❖ Reducing Uncertainty

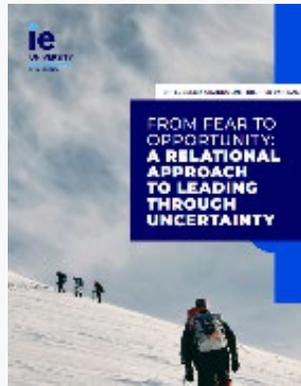

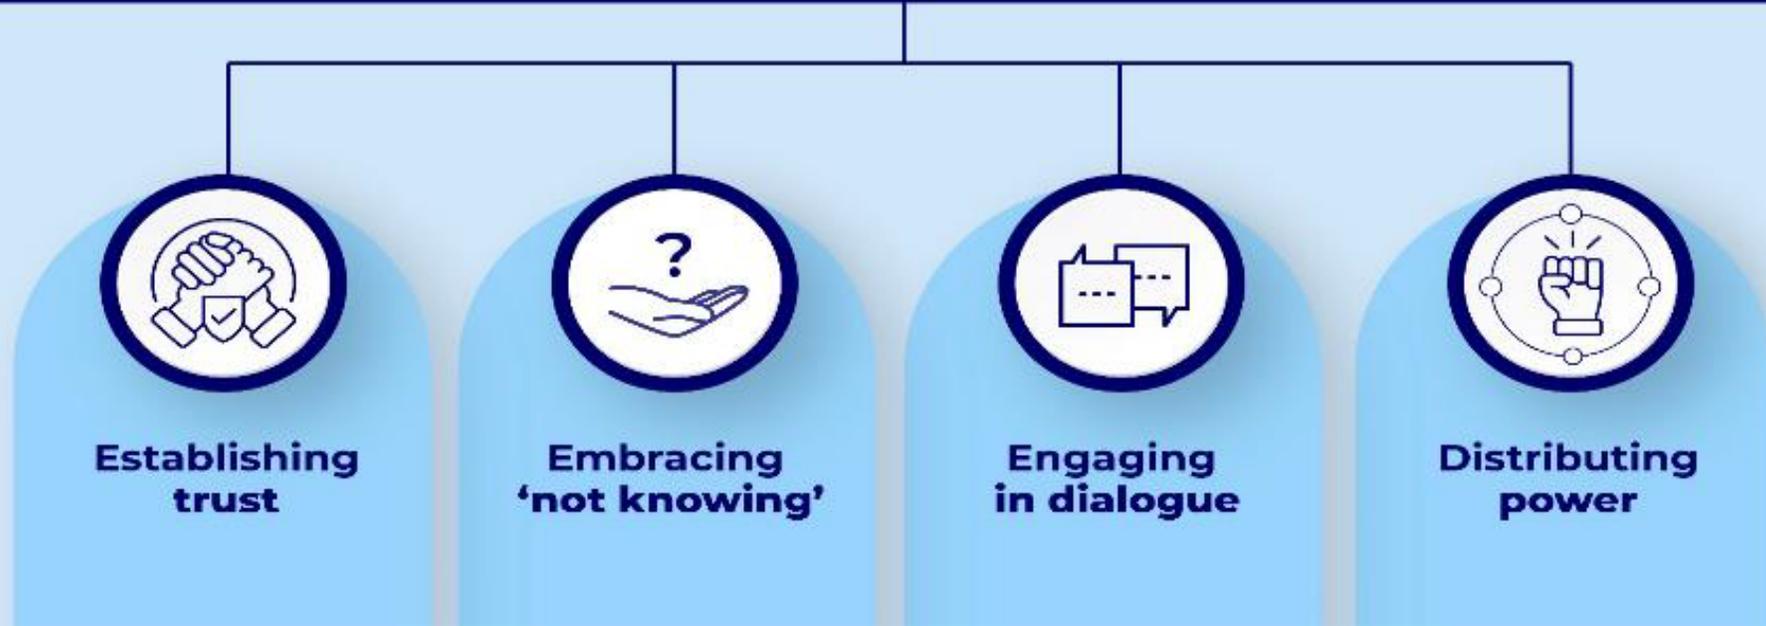

- Continue seeking for additional information
- Delaying decision making

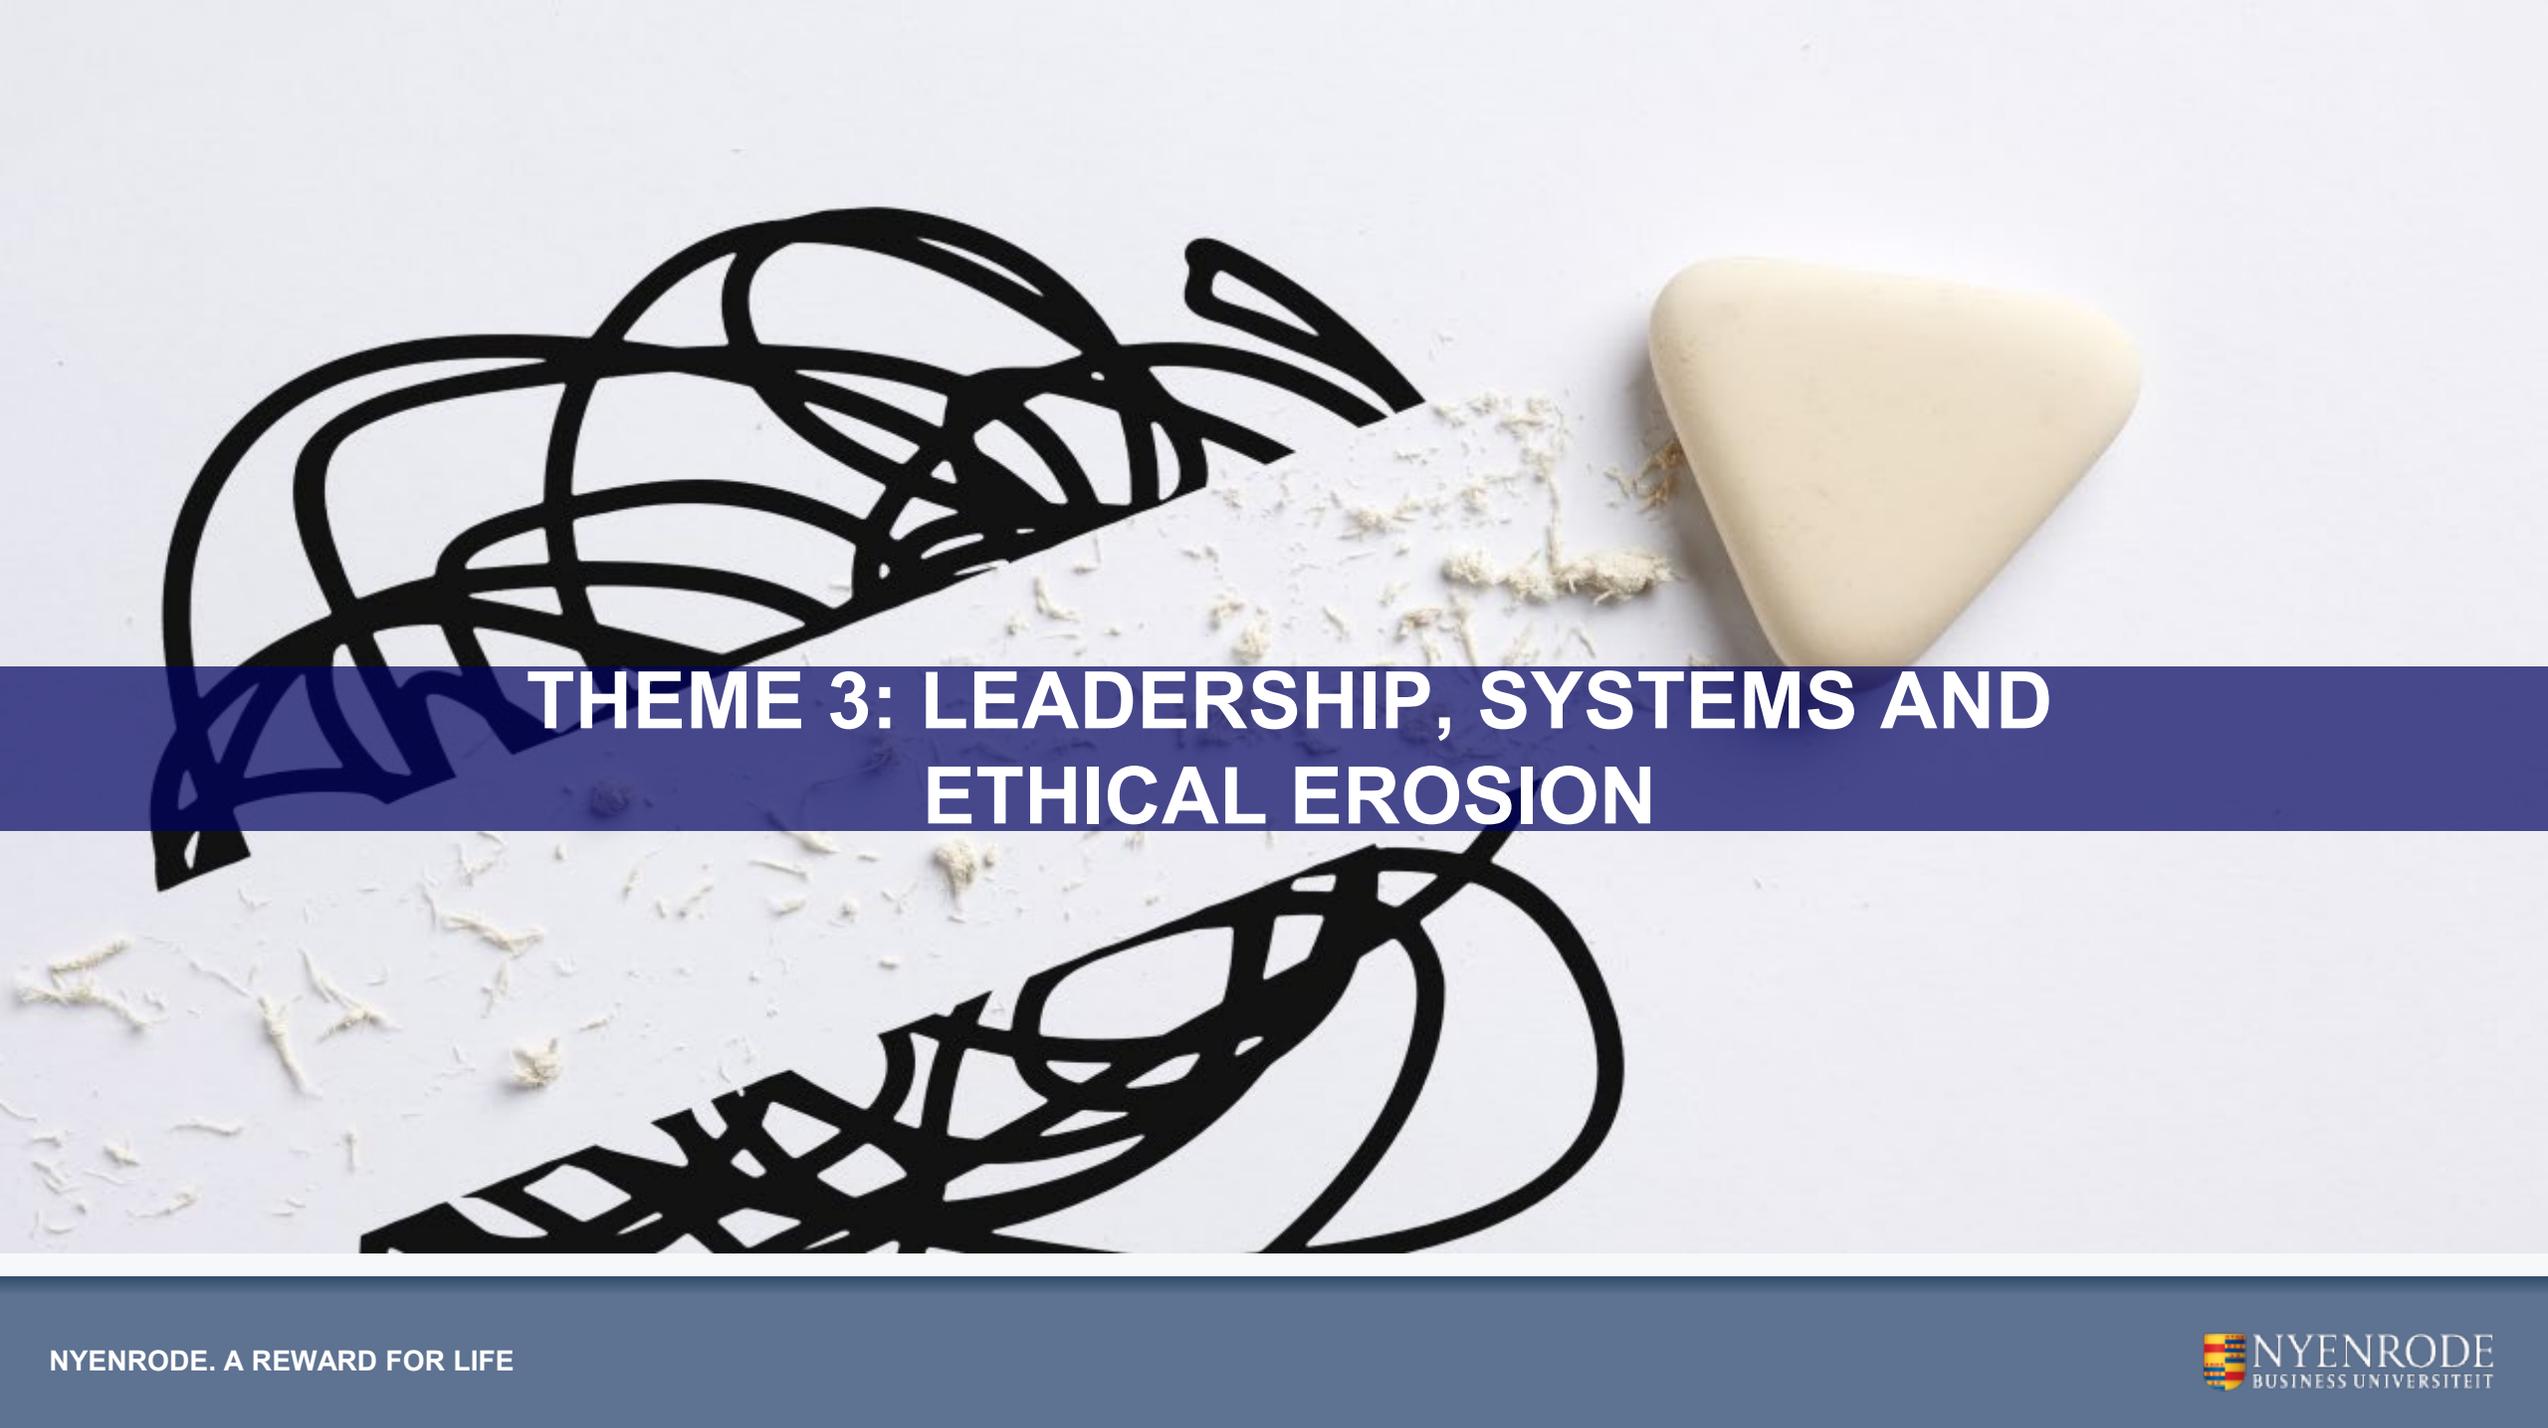

## LEADERSHIP PRACTICES ADDRESSING UNCERTAINTY

### ADOPTING A RELATIONAL APPROACH

© 2024, Dr. Lucrecia Grandolini & Dr. Nick van Dam

**THEME 3: LEADERSHIP, SYSTEMS AND  
ETHICAL EROSION**

# NUREMBERG

### **Narcissistic Personality Disorder (NPD)**

**Prevalence:** ~1–6% of general population

#### **Leadership risk profile:**

- Grandiosity, entitlement
- Excessive need for admiration
- Exploitative interpersonal style
- Low empathy

#### **Organizational impact:**

- Ethical risk-taking and overconfidence
- Suppression of dissent
- High volatility in strategy
- Toxic culture centered around leader image

Source: DSM-5-TR (American Psychiatric Association, 2022)

### **Paranoid Personality Disorder (PPD)**

**Prevalence:** ~2–4% of general population

#### **Leadership risk profile:**

- Distrust and suspicion
- Attribution of hostile intent
- Suspicious over-attention

#### **Organizational impact:**

- Culture of fear
- Over-control and micromanagement
- Reduced collaboration
- Escalating internal conflict

### **Psychopath Personality Disorder**

**Prevalence:** ~0.5–1% of the general population.

#### **Leadership risk profile (psychopathic traits)**

- Emotional detachment and lack of empathy
- Instrumental manipulation of people and information
- Moral disengagement and absence of remorse

#### **Organizational impact**

- Normalization of unethical and rule-bending behavior
- Fear-based compliance replacing trust and engagement
- Short-term performance spikes followed by long-term decline

**Narcissistic Personality Disorder (NPD)**  
**Prevalence:** ~1–6% of general population

**Paranoid Personality Disorder (PPD)**  
**Prevalence:** ~2–4% of general population

**Psychopath Personality Disorder**  
**Prevalence:** ~0.5–1% of the general population.

## QUESTION:

Which biases in our hiring and promotion systems allow toxic personality traits to be mistaken for leadership potential?

# System: People can become part of harmful systems without intending to

## System Effect

- People adapt to systems faster than systems adapt to values
- Careers, fear, conformity shape behavior
- Silence becomes passive endorsement
- Culture teaches what is “realistic”

## How drift happens (rarely through one big decision):

- Gradual normalization of small deviations
- Incentives override values
- Authority reduces dissent
- Diffusion of responsibility (“just my role”)

**QUESTION: What needs to be done to prevent ‘drifting’ in organization?**

# THEME 4: Human Edge in The Age of AI

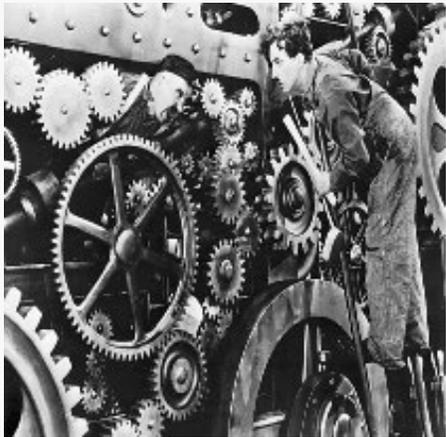

The background features a dark blue field with glowing white circuit traces. In the center, three stylized human figures are highlighted with a soft glow. To the right, a hand is shown in a pointing gesture, partially overlapping the circuit pattern.

# Humans and Machines Partners in Progress

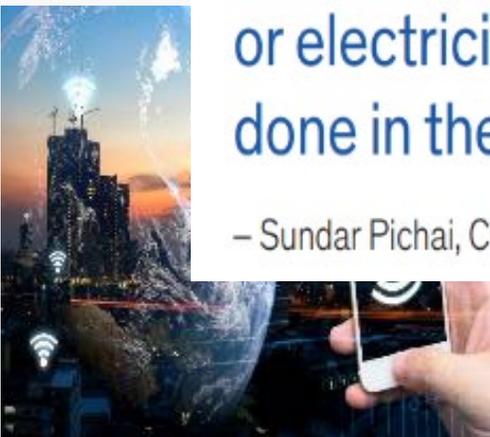

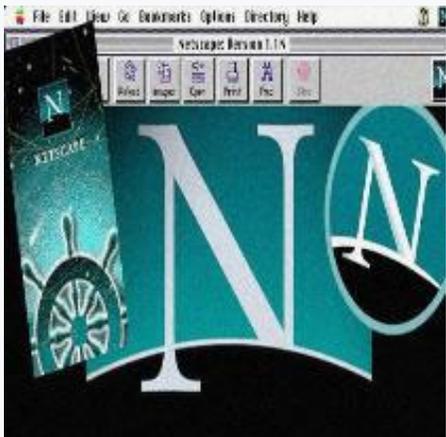

# TECHNOLOGIES

## The Driving Force of Change in Work

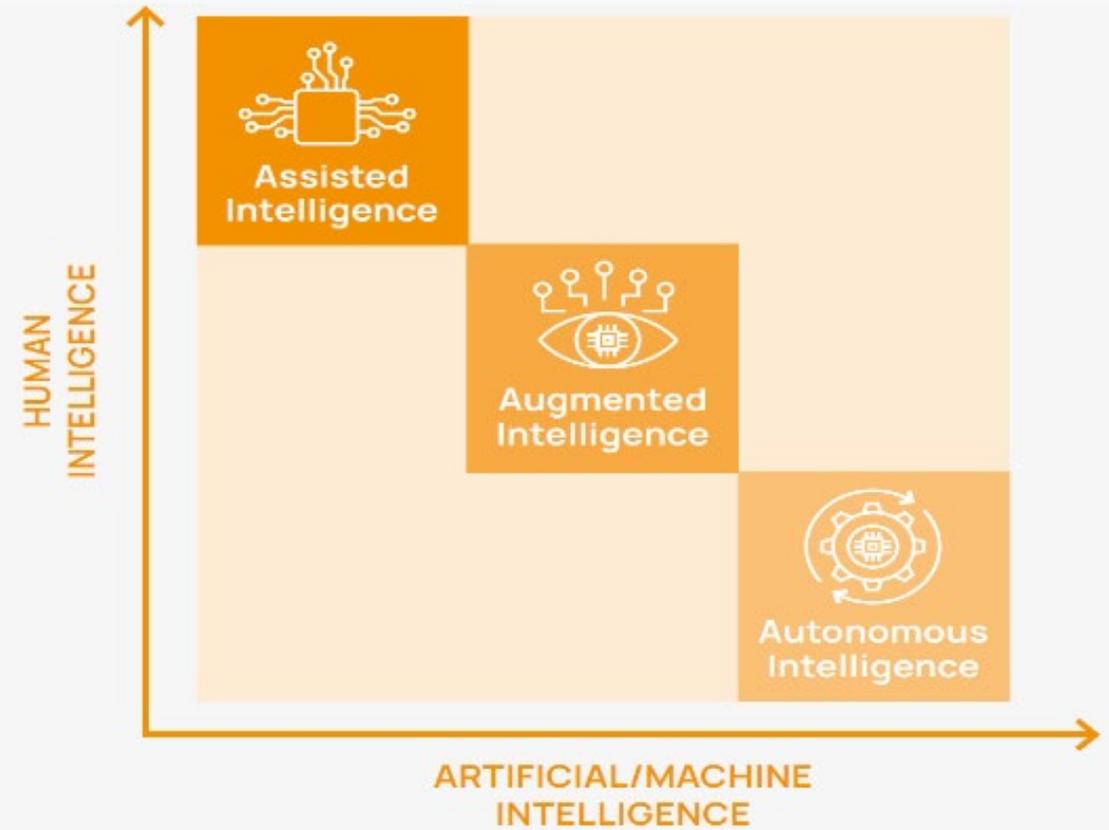

'I've always thought of AI as the most profound technology humanity is working on ... more profound than fire or electricity or anything that we've done in the past.'

– Sundar Pichai, CEO of Alphabet

# THE RISE OF AI-POWERED LAYOFFS IN 2025

**Microsoft to cut about 4% of jobs amid hefty AI bets**

Computer giant Dell continues this year's tech industry layoffs, firing around 12,500 employees or 10% of its global workforce. This move comes as Dell implements its new artificial intelligence (AI) strategy.

**Morgan Stanley to cut 2,000 jobs as AI reshapes Wall Street**

**100,000+ tech layoffs in 2025: Amazon, Microsoft, Intel, and these companies cut thousands of jobs**

**Salesforce CEO Marc Benioff says his company has cut 4,000 customer service jobs as AI steps in: 'I need less heads'**

Intel: Plans to reduce its workforce by 21,000 to 25,000 employees (15-24%), including 15%-20% cuts in its [Intel](#) Foundry division, to focus on AI chip production and factory streamlining, led by CEO Lip-Bu Tan.
